Mr. Michael B. Martin
Heavyweight Solutions

Re: NFSI Certification

Dear Mr. Martin;

Please accept this letter as our report for the product sample you had recently submitted. The product sample were tested under NFSI method 101-B and the results were as follows:

Product	Flooring Material	Before Wet SCOF / After Wet SCOF
The Heavyweight	Unfinished Wood	0.29 / 0.57
	Quarry Tile	0.49 / 0.81

As you can see from the results listed above, The Heavyweight brush had increased the wet SCOF of the wood floor by 96% and increased the wet SCOF of the quarry tiled surface by 65%. Based on these results, we are pleased to inform you that The Heavyweight is hereby NFSI Certified as to its ability to improve walkway safety.

Regards,

Russell J. Kendzior
