Re: NFSI Certification

Dear Mr. Martin;

Please accept this letter as our report for the product sample you had recently submitted. The product sample were tested under NFSI method 101-B and the results were as follows:

<u>Product</u>	<u>Flooring Material</u>	<u>Before Wet SCOF / After Wet SCOF</u>
The Heavyweight	Unfinished Wood	0.29 / 0.57
	Quarry Tile	0.49 / 0.81

As you can see from the results listed above, The Heavyweight brush had increased the wet SCOF of the wood floor by 96% and increased the wet SCOF of the quarry tiled surface by 65%. Based on these results, we are pleased to inform you that The Heavyweight is hereby NFSI Certified as to its ability to improve walkway safety.

Regards,

Russell J. Kendzior
Executive Director
